Attachment 1: Pricing Model

Pricing Model Principles

- Clearly define “when and how” ILHIE financial sustainability point is reached.
- Develop a pricing mechanism that is perfectly aligned with our existing cost structure.
- Have a modular pricing framework that can easily be adjusted over time as variables change.
- Maintain a cap on pricing to the very large health systems to create incentives for these market drivers to participate and help push large-scale adoption.
- Develop a pricing structure that is implementable with existing RHIO pricing strategy.
- Have a low yearly price to each PROVIDER to encourage & promote individual adoption, even to those with minimal utilization of our network and services.
- Have a mechanism to allow for a varied Medicaid contribution.
